Western Energy Services of Durango, Inc. (WESODI) is a wholly owned subsidiary of La Plata Electric Association, Inc. BWR Constructors, Inc. (BWR) is a subsidiary of WESODI. Together these companies provide a versatile and qualified construction team that creates value for our customers by bringing extensive experience in all phases of power line and telecommunication, (including transmission, substation, and distribution) system construction, related maintenance, upgrade, and restoration services.

These companies also provide electric line locating services, meter reading services, trenching, excavation, underground utilities installation, maintenance, and other aspects of civil construction, as well as oil field support services.

These responsive teams of skilled professionals provide our customers with the most efficient, cost-effective alternative to complete power, telecommunication system construction, and maintenance. WESODI and BWR's value driven services assure our customers a competitive edge in today's rapidly changing energy, telecommunication systems, and civil construction needs.
